Marker Swatch Template
by Kristy Dalman
www.theoddgirl.com

I created this template to be friendly to any medium you choose to use which is why you will not find color numbers written in. It is also flexible in how you would like to use it, group colors by families, your favorite blending groups or however else makes sense to you! Each swatch also has a spot marked for you to punch a hole to make color matching that much easier! Cut shorter swatches to easily keep track of your favorite blending groups as well.

If you like this template please check out my blog for more tutorials, art and more. www.theoddgirl.com

-Kristy

how to use this template:

1. Print it out on the paper you color with most to get the best color representation possible
2. Cut the tempate out on the thick lines around the outside and vertically
3. On the lines provided write in the colors you will be making swatches of making sure to use an ink that is appropriate to the marker you are using
4. Color the squares with the colors written.
5. using a small punch (approximately .5 inches) punch out the shape on the "X" in each swatch
6. Punch a hole in the top left of each strip and put on a ring for easy use and flipping.
